(Q. No. 16 - 25) Read the following passage and answer the questions that follow:

The Mona Lisa was one of the Leonardo da Vinci's favourite paintings, and he carried it around with him until he died. Today it is regarded as the most famous painting in the world, and is viewed by thousands of people annually. Who is this painted figure? Many suggestions have been made, and the most likely candidate is Lisa Gherardini, the wife of a Florentine silk merchant.

Another more likely, but popular theory, is that the painting was a self-portrait. There are certain similarities between the facial features of the Mona Lisa and the artist's self-portrait painted many years later. Could this be the reason for Vinci giving the portrait such an enigmatic smile?

Today, the Mona Lisa looks rather sombre, in dull shades of brown and yellow. The varnish covering the paint has yellowed over the years giving it a dull shade.

In 1911 the painting was stolen by a former employee who believed that the painting belonged to Italy. However, he was apprehended by the police two years later and the painting was returned to the Louvre, where it is placed even today.
